

Cost of Living CRISIS

The cost of living is soaring, while most people's wages and incomes remain stagnant. More and more people are faced with a choice of heating or eating and struggling to pay the bills. At the same time energy companies are making huge profits. We need to build a movement to demand that the government takes real action to control price increases and protect incomes.

Demand action on

- **Energy Costs:** Control the price of heating and energy. Retrofit homes to save energy.
- **Public Services:** Abolish charges and fees for health, education and childcare. Introduce free and frequent public transport.
- **Housing:** Ban evictions, freeze rents and make housing affordable.
- **Wages and incomes:** Introduce a Living Wage. Increase wages, student grants, pensions and social welfare payments.
- **Wealth Inequality:** Introduce a windfall tax on energy companies to stop profiteering. Tax the wealthy and introduce a vacant property tax.

March On the Dáil, June 18th
Assemble 1.00pm Parnell Sq,
Dublin.
